DESCRIPTORS	Elementary Secondary Education; Higher Education; Income; *Librarians; *Libraries; Library Associations; Library Automation; Library Circulation; Library Collections; Library Services; *Library Statistics; Municipalities; Salaries; Tables (Data)
IDENTIFIERS	*New Mexico

ABSTRACT

This directory identifies members of the New Mexico State Library Commission, the New Mexico Advisory Council on Libraries, and staff at the New Mexico State Library. It goes on to list New Mexico libraries alphabetically by city. Within each city libraries are subdivided into public, academic, special, and school categories. Electronic mail addresses, whenever known, are included. Also included are: New Mexico State depository libraries; National Voter Registration Act library sites; public library hours; library associations and networks; certified librarians; and a librarian/library name index. The library statistics section gives a statistical picture of the condition of public and school libraries throughout New Mexico and contains data compiled from the Public Library Annual Report for fiscal year 1993-1994. Statistics, sorted by population, include: (1) local government revenue & local government revenue per capita; (2) total circulation and circulation per capita; (3) library staff salary survey; (4) per capita measures of visits, circulation and holdings, program attendance, collection turnover rate, and population to staff; (5) service: holdings-outputs; (6) networking & automation, including type of PC, modem, library software, presence of online circulation and catalog; (7) definitions of the Federal-State Cooperative System for Public Library Data (FSCS) used to collect the public library statistics for the graphs; and (8) graphs of New Mexico school data for elementary, middle, high school, and private/parochial schools. (SWC)

NEW MEXICO LIBRARY DIRECTORY and STATISTICS
1995

Features of the 1995 Library Directory

The 1995 edition of the Library Directory lists public, academic, special, and school libraries in separately identified categories under the cities in which they are located. Cities, towns, and villages are listed alphabetically, as are the libraries under each category. This year we have also included electronic mailing addresses whenever known, and expect this type of entry to increase as more librarians go on the Internet. A separate page lists the hours that public libraries are open to the public.

New Mexico Library Commission, New Mexico Advisory Council on Libraries and the State Library staff are listed on pages iii-vi. The section following the directory of libraries lists library associations, and is followed by the section listing certified librarians. The index of librarians gives an association to the libraries where they work, and the index of libraries/town names is a further identification tool.

Library Statistics Section

This year the definitions which are used to collect the public library statistics are included with the graphs. New Mexico cooperates with the National Center for Education Statistics in the collection of uniform public library statistical data nationwide.

All of the hard work that goes into the reporting from the libraries is reflected in this document. These statistics stand as a record and as a history for the libraries of New Mexico.

Libraries listed in the directory were asked to provide the information for this publication and as much of that information as could fit into the editorial format has been included. Every effort has been made to prepare an accurate directory with up-to-date information. We request that any inaccuracies or changes be brought to our attention for the 1996 edition. There is a form on the last page of this directory for that purpose.

This directory is available upon request on computer disc, in braille, and in large print.

CERTIFIED LIBRARIANS

A permanent professional librarian's certificate is required for the chief librarian of any public library serving a municipality or other political subdivision with a population in excess of 15,000 and for the chief librarian of any state agency or state-supported institution of higher education.

A Grade II librarian's certificate for the chief librarian of any library supported by public funds and serving municipality or other political subdivision having a population of at least 10,000 but not more than 15,000 persons, as shown by the last federal decennial census.

A Grade I librarian's certificate is required for the chief librarian or any library supported by public funds and serving a municipality or other political subdivision having a population of at least 3,000 persons, but not more than 10,000 persons as shown by the last federal decennial census.

The State Librarian is authorized to issue certificates to librarians by prescribing and holding examinations or by requiring the submission of credentials to establish qualifications.

Highlights of Statistics for Public Libraries

The 1995 edition of the New Mexico Library Directory and Library Statistics includes data gathered by the State Library through the New Mexico Public Library Annual Report which library directors complete and return to the State Library each year and is as accurate as the information that is provided. It gives a statistical picture of the condition of public libraries throughout the state. Data included covers population, staffing, services, collection, circulation, revenue and expenditures. Selected per capita figures have been generated to help in analyzing the raw data plus a table of network and automation, and a listing of salaries arranged by job and sorted by population. All of the charts are sorted by population so that library boards can compare similar communities.

Notes on the statistics

Data was compiled from Public Library Annual Report FY 1993-1994. They were mailed in July 1994 and due in August Statistical descriptions condense factual information about many aspects of library operations and present this information in various ways. However, statistics should be viewed by librarians and trustees as tools and not ends in themselves. The climate for each library in the state is unique, so comparisons should be made carefully.

One measure of library activity-Turnover Rate

The turnover rate is a ratio that presents the relationship between the number of loans of library materials to the number of items in the library collections. It is just one measure of the activity of libraries' collections, indicating the number of times each unit of library material would have circulated during the year if circulation had been spread evenly throughout all collections.

Analysis and use of this data should be interpreted carefully because it can mean different things, depending on circumstances. For example: a high turnover rate means a high circulation compared to the collection size. Therefore; a collection of mainly high-interest, circulating materials will have a high turnover rate. However, a library with a wide range of materials, including less popular titles, or with a large reference collection will have a lower turnover rate. Additionally, high in-library materials use and a low turnover rate may mean that materials tend to be used in the library rather than being checked out. Nevertheless, a library with a large proportion of out-of-date or inappropriate materials will have a low turnover rate. This rate could suggest the this library should consider weeding their collection; puchasing multiple copies of popular materials, discarding when demand declines; and merchandising materials to attract user attention. Increasing circulation without increasing the collection size will increase the turnover rate.

The 1994 New Mexico public library data was submitted to the Federal-State Cooperative System (FSCS) for Public Library Data for publication by the National Center for Educational Statistics (NCES) again this year. This data provides the most up-to-date and current national descriptive data on the status of nearly 9,000 public libraries and are used by federal, state and local officials for planning, evaluation and policy-making.

Population estimates were supplied by the University of New Mexico, Bureau of Business and Economic Research, 1990 Census/Population Dissemination and Analysis Project, U.S. Department of Commerce, Bureau of the Census, February 8, 1994.

The Development Bureau will provide additional data and analysis not included in this report upon request. The State Library welcomes any suggestions for further improvements for this document.

If you need further information about this statistical report, please call or write: Elaine Goodman, New Mexico State Library, 325 Don Gaspar, Santa Fe NM 87501-2777 PHONE: (505) 827-3811

DEFINITIONS

The following are the definitions which are used by the Federal State Cooperative System for public library data. New Mexico makes some adjustments to these definitions to meet New Mexico Rule 93-1.

PUBLIC LIBRARY

Definition: A public Library is established under state enabling laws or regulations to serve the residents of a community, district, or region. A public library is an entity that provides at least the following: 1) an organized collection of printed or other library materials, or a combination thereof; 2) a paid staff to provide and interpret such materials as required to meet the informational cultural, recreational, and/or educational needs of a clientele; 3) an established schedule in which services of the staff are available to clientele; and 4) the facilities necessary to support such a collection, staff, and schedule.

Note: State law determines whether an entity is a public library.

ADMINISTRATIVE ENTITY

Definition: This is the public library, state library agency, system, federation, or cooperative service that is legally established under local or state law to provide public library service to a particular client group (for example, the population of a local jurisdiction, the population of a state, or the public libraries located in a particular region). The Administrative Entity may be administrative only and have no outlets, it may have a single outlet, or it may have more than one outlet.

#	Data Element Name	Data Element Definitions and Notes
01	LIB ID (Optional)	Definition: This is the state-assigned identification code for the Administrative Entity.
1A	FSCS ID (Automatic Display)	Definition: This is the identification code assigned by NCES to the Administrative Entity.
02	Name	Definition: This is the legal name of Administrative Entity. Note: Provide the Name of the public library. If the Administrative Entity is a State Library agency of a system, federation, or cooperative service, provide its name.

03 Street Address

Definition: This is the complete street address of the Administrative Entity.

Note: Do not report a post office box or general delivery.

04 City

Definition: This is the city or town in which the Administrative Entity is located.

05 Zip 1

Definition: This is the standard five-digit postal zip code for the street address of the Administrative Entity.

06 Zip 2

Definition: This is the four-digit postal zip code extension for the street address of the Administrative Entity.

07 Phone

Definition: This is the telephone number of the Administrative Entity, including area code.

7A Interlibrary Relationship Code

Select one of the following:

HQ -- Headquarters of a system, federation, or cooperative service. (Include any system, federation, or cooperative service member acting in this role.)
ME -- Member of a system, federation, or cooperative service, but not the headquarters.
NO -- Not a member of a system, federation, or cooperative service.

Headquarters of a System, Federation, or Cooperative Service

Definition: The library or entity that provides the physical space and staff who manage, coordinate, or administer the programs of the system, federation, or cooperative service.

Member of a System, Federation, or Cooperative Service

Definition: An autonomous library joined by formal or informal agreement(s) with other autonomous libraries to perform various services cooperatively, such as resource sharing, communications, etc. This does include libraries that are part of multitype library systems, federations, or cooperative services. This does not include multiple outlet administrative entities (e.g., libraries with branches and that have the word "system" in their legal name) if the entity does not have an agreement with another autonomous library.

Note: For the purposes of this classification, networks such as OCLC and Internet are not considered systems, federations, or cooperative services.

7B Legal Basis Code

Definition: The legal basis is the type of local government structure within which the entity functions.

Note: For combined libraries (i.e. combined school/public libraries or academic/public libraries) use the specific SP or AP codes instead of the other legal basis codes.

Select one of the following:

AP -- Combined Academic/Public Library
CI -- Municipal Government (city, town, or village)
CO -- County/Parish
MJ -- Multi-jurisdictional
NL -- Native American Tribal Government
NP -- Non-profit Association or Agency
SC -- School District
SL -- State Library Agency
SD -- Special Library District (authority, board, commission)
SP -- Combined School Media Center/Public Library
OT -- Other
AP -- Combined Academic/Public Library

Definition: A library service as both a college or university library and public library which is governed, funded, and operated by one or more legally constituted administrative jurisdictions.

CI -- Municipal Government (city, town or village)

Definition: A municipal government is an organized local government authorized in a state's constitution and statutes and established to provide general government for a specific concentration of population in a defined ares.

CO -- County/Parish

Definition: An organized local government authorized in a state's constitution and statutes and established to provide general government.

MJ -- Multi-jurisdictional

Definition: An entity operated jointly by two or more units of local government under an intergovernmental agreement which creates a jointly appointed board or similar means of joint governance; to be distinguished from a library which contracts to serve other jurisdictions and from special library districts.

NL -- Native American Tribal Government

Definition: An organized local government authorized and established to provide general government to residents of a Native American reservation.

Note: Include Native Alaskan villages in this category.

NP -- Non-Profit Association or Agency

Definition: An entity privately controlled but meeting the statutory definition of a public library in a given state; included association libraries.

SC -- School District

Definition: An organized local entity providing public elementary, secondary, and/or higher education which, under state law, has sufficient administrative and fiscal autonomy to qualify as a separate government. Excludes "dependent public school systems" of county, municipal, township, or state governments.

SL -- State Library Agency

Definition: That agency within each of the states and territories which administers the Federal Library Services and Construction Act funds and which is authorized by a state to develop library services in the state. It may also provide direct services to the public.

SD -- Special Library District (authority, board, commission)

Definition: This is a district, authority, board or commission authorized by state law to provide library services.

SP -- Combined School Media Center/Public Library.

Definition: A library serving as both a school media center and public library which is governed, funded, and operated by one or more legally constituted administrative jurisdictions.

OT -- Other

7C Administrative Structure Code

Definition: This code identifies an autonomous library entity that has its own governance and funding.

Select one of the following:

AO -- Administrative Entity Only
MA -- Administrative Entity with Multiple Direct Service Outlets where Administrative Offices are Separate
MO -- Administrative Entity with Multiple Direct Service Outlets where Administrative Offices are Not Separate
SO -- Administrative Entity with a Single Direct Service Outlet

AO -- Administrative Entity Only

Definition: An Administrative Entity that does not serve the public directly and has no direct service outlets but may provide staff, materials, and services to other libraries; may receive and spend funds on behalf of other libraries; or may contract with other libraries to provide various library services. Examples are headquarters of systems, federations, or cooperative services.

MA - Administrative Entity with Multiple Direct Service Outlets where Administrative Offices are Separate

Definition: An Administrative Entity that serves the public directly with two or more service outlets, including some combination of central librar(ies), branch(es), bookmobile(s), and/or books-by-mail only. The administrative offices are separate from the direct service outlets and do not provide direct library services.

MO - Administrative entity with Multiple Direct Service Outlets where Administrative Offices are Not Separate.

Definition: An Administrative Entity that serves the public directly with two or more service outlets, including some combination of a central librar(ies), branch(es), bookmobile(s), and/or books-by-mail only.

SO - Administrative Entity with a Single Direct Service Outlet

Definition: An Administrative Entity that serves the public directly with one central library, books-by-mail only, or one bookmobile.

08 Population of the Legal Service Area

Definition: The number of people in the geographic area for which a public library has been established to offer services and from which (or on behalf of which) the library derives income, plus any areas served under contract for which the library is the primary service provider.

Note: The determination of this population figure shall be the responsibility of the state library agency. This population figure should be based on the most recent official state population figures for jurisdictions in your state available from the State Data Center.

The State Data Center should obtain these figures annually from the State Data Center or other official state sources. For administrative entities that do not serve the public directly and have no outlets (e.g., a system, federation, or cooperative service), this number shall be zero.

09 Number of Central Libraries

Definition: This is one type of single outlet library (SO) or the library which is the operational center of a multiple-outlet library (MO or MA). Usually all processing is centralized here and the principal collections are housed here. Synonymous with main library.

Note: Not all Administrative Entities have a central library and some Administrative Entities have more than one central library.

10 Number of Branch Libraries

Definition: A branch library is an auxiliary unit of an Administrative Entity which has at least all of the following: 1) separate quarters; 2) and organized collection of library materials; 3) paid staff; and 4) regularly scheduled hours for being open to the public.

11 Number of Bookmobiles	Definition: A bookmobile is a traveling branch library. It consists of at least the following: 1) a truck or van that carries an organized collection of library materials; 2) paid staff; and 3) regularly scheduled hours (bookmobile stops) for being open to the public.
12 Number of Books-by-Mail Only (Automatic Display)	This is a count generated automatically by DECPLUS based on response to Outlet Type Code (See Date Element #9 on the Outlet file.)

PAID STAFF (FULL-TIME EQUIVALENT)

Report figures as of the last day of the fiscal year. Include all positions funded in the library's budget whether those positions are filled or not. To ensure comparable data, 40 hours per week has been set as the measure of full-time employment (FTE).

13 ALA-MLS	Definition: Librarians with master's degrees from graduate library education programs accredited by the American Library Association.
14 Total Librarians	Definition: These are persons who do paid work that usually requires professional training and skill in the theoretical or scientific aspects of library work, or both, as distinct from its mechanical or clerical aspect. This data element also includes ALA-MLS (Data Element #13).
15 All Other Paid Staff	Definition: This includes all other FTE employees paid from the reporting unit budget, including plant operations, security, and maintenance staff.
16 Total Paid Employees	Definition: This is the sum of total librarians (Data Element #14) and all other paid staff (Data Element #15).

OPERATING INCOME

Report income used for operating expenditures as defined below. Include federal, state, or other grants. DO NOT include income for major capital expenditures, contributions to endowments, income passed through to another agency (e.g. fines), or funds unspent in the previous fiscal year. (Funds transferred from one public library to another public library should be reported by only one of the public libraries. The State Data Coordinator shall determine which library will report these funds.)

17 Local Government

Definition: This included all tax and non-tax receipts designated by the community, district, or region and available for expenditure by the public library. Do not include the value of any contributed or in-kind services or the value of any gifts and donations, fines, or fees.

18 State Government

Definition: These are all funds distributed to public libraries by State government for expenditure by the public libraries, except for federal money distributed by the State. This includes funds from such sources as penal fines, license fees, and mineral rights.

19 Federal Government

Definition: This includes all federal government funds distributed to public libraries for expenditure by the public libraries, including federal money distributed by the State.

20 Other Income

Definition: This is all income other than that reported in Data Elements #17, #18, and #19. Include, for example, monetary gifts and donations received in the current year, interest, library fines, and fees for library services. Do not include the value of any contributed or in-kind services or the value of any nonmonetary gifts and donations.

OPERATING EXPENDITURES

Operating expenditures are the current and recurrent costs necessary to support the provision of library services.

22 Salaries & Wages Expenditures	Definition: This includes salaries and wages for all library staff (including plant operations, security, and maintenance staff) for the fiscal year. Include salaries and wages before deductions but exclude employee benefits.
23 Employee Benefits	Definition: These are the benefits outside of salaries and wages paid and accruing to employees (including plant operations, security, and maintenance staff), regardless of whether the benefits or equivalent cash options are available to all employees. Include amounts spent by the reporting unit for direct, paid employee benefits including Social Security, retirement, medical insurance, life insurance, guaranteed disability income protection, unemployment compensation, workmen's compensation, tuition, and housing benefits. Only that part of any employee benefits paid out of the public library budget should be reported.
24 Total Staff Expenditures	Definitions: This includes salaries and wages (Data Element #22), and employee benefits (Data Element #23).
25 Collection Expenditures	Definition: This includes all expenditures for materials purchased or leased for use by the public. It includes print materials, microforms, machine-readable materials, audiovisual materials, etc.
26 Other Operating Expenditures	Definition: This includes all expenditures other that those for staff (Data Element #24) and collection (Data Element #25).
27 Total Operating Expenditures	Definition: This includes total expenditures on staff, total expenditures on collection, and other operating expenditures (Data Elements #24, #25, and #26).

28 Capital Outlay

Definition: These are funds for the acquisition of or additions to fixed assets such as building sites, new buildings and building additions, new equipment, initial book stock, furnishings for new or expanded buildings, and new vehicles. This excludes replacement and repair of existing furnishings and equipment, regular purchase of library materials, and investments for capital appreciation.

Note: Local accounting practices shall determine whether a specific item is a capital expense or an operating expense regardless of the examples in the definition.

LIBRARY COLLECTION

Note: Report physical units for items 29-33. For smaller libraries when volume data are not available, title information may be substituted. Items which are packaged together as a unit, e.g., two compact discs, two films, or two video cassettes, and are generally checked out as a unit, should be counted as one physical unit.

29 Book/Serial Volumes

Definition: Books are non-periodical printed publications bound in hard or soft covers, or in loose-leaf format, of at least 49 pages, exclusive of the cover pages; or juvenile non-periodical publications of any length bound in hard or soft covers. Serials are publications issued in successive parts, usually at regular intervals, and as a rule, intended to be continued indefinitely. Serials include periodicals (magazines), newspapers, annuals (reports, yearbooks, etc.), memoirs, proceedings, and transactions of societies. Except for the current volume, count unbound serials as a volume when the library has at least half of the issues in a publisher's volume.

30 Audio

Definition: These are materials on which sounds (only) are stored (recorded) and that can be reproduced (played back) mechanically or electronically, or both. Included are records, audio cassettes, audio cartridges, audio discs, audio reels, talking books, and other sound recordings.

31 Film

Definition: The term film is used interchangeably with "motion picture" which is a length of film, with or without recorded sound, bearing a sequence of still images that creates the illusion of movement when projected in rapid succession (usually 18 or 24 frames per second). Motion pictures are produced in a variety of sizes (8 super 8, 16, 35, 55, and 70mm) and in a variety of forms (cartridge, cassette, loop, and reel).

32 Video

Definition: These are materials on which pictures are recorded, with or without sound. Electronic playback reproduces pictures, with or without sound, using a television receiver or monitor.

33 Subscriptions

Definition: This refers to the arrangements by which, in return for a sum paid in advance, periodicals, newspapers, or other serials are provided for a specified number of issues.

Note: Count subscriptions purchased from the library's budget and those donated to the library as gifts. Include the total number of subscriptions for all outlets.

SERVICES

34 Unduplicated Hours

No longer collected.

35 Public Service Hours/Year

Definition: This is the sum of annual public service hours for outlets.

Note: Include hours for central (data element #9), branches (data element #10), bookmobiles (data element #11), and books-by-mail only (data element #12). For each bookmobile, count only the hours during which the bookmobile is open to the public. For Administrative Entities that offer ONLY books-by-mail only service, count the hours that the outlet is staffed for service. Minor variations in scheduled public service hours need not be included.

36 Library Visits

Definition: This is the total number of persons entering the library for whatever purpose during the year.

Note: If an actual count of visits is unavailable, determine an annual estimate by counting visits during a typical week in October and multiplying the count by 52. A "typical week" is a time that is neither unusually busy or unusually slow. Avoid holiday times, vacation periods for key staff, or days when unusual events are taking place in the community or the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days, from Sunday through Saturday (or whenever the library is usually open).

37 In-Library Use

No longer collected, but under consideration for future data collection.

38 Reference Transactions

Definition: A reference transaction is an information contact which involves the knowledge, use, recommendations, interpretation, or instruction in the use of one or more information sources by a member of the library staff. It includes information and referral services. Information sources include printed and non-printed materials, machine-readable databases, catalogs and other holdings records, and, through communication or referral, other libraries and institutions and people inside and outside the library. The request may come in person, by phone, fax, mail, or by electronic-mail from an adult, a young adult, or a child.

Do not count directional transactions or questions of rules or policies. Examples of directional transactions are "Where are the children's books?" and "I'm looking for a book with the call number 811.2G." An example of a question of rules or policies is "Are you open until 9:00 tonight?"

Note: If an actual count of reference transactions is unavailable, determine an annual estimate by counting reference transactions during a typical week in October and multiply the count by 52. A "typical week" is a time that is neither unusually busy or unusually slow. Avoid holiday times, vacations periods for key staff, days when unusual events are taking place in the community or in the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days, from Sunday through Saturday (or whenever the library is usually open).

39 Total Circulation

Definition: The total annual circulation of all library materials of all types, including renewals.

Note: Count all materials in all formats that are charged out for use outside the library. Interlibrary loan transactions included are only items borrowed for users. Do not include items checked out to another library.

INTER-LIBRARY LOANS

40 Provided To

Definition: These are library materials, or copies of the materials, provided by one library to another library upon request. The libraries involved in interlibrary loans are not under the same library administration. These data are reported as annual figures.

41 Received From

Definition: These are library materials, or copies of the materials, received by one library from another library upon request. The libraries involved are not under the same library administration. These data are reported as annual figures.

42 Circulation of Children's Materials

Definition: The total annual circulation of all children's materials in all formats to all users. It includes renewals.

43 Children's Program Attendance

Definition: The count of the audience at all programs for which the primary audience is children. Includes adults who attend programs intended primarily for children.

Note: Output Measures for Public Library Service to Children; A Manual of Standardized Procedures (ALA, 1992) defines children as persons age 14 and under.
